

1. You need a gmail account and the latest version of Firefox or Chrome.
2. <https://colab.research.google.com/notebooks/>
3. On the orange menu bar, select **GITHUB**.
4. Uncheck the “**Include private repos**” box
5. Paste the following link on to the search bar
<https://github.com/cagBRT/Intro-to-ML-Programming/blob/master/IntroToMachineLearningProgramming.ipynb>
6. Click between the square brackets (**[]**) on the first cell. This will execute the commands in that cell.

If you get a warning box, select **RUN ANYWAY**

7. Run the second, third, and fourth cells.
The third and fourth cells explain a little about Google CoLabs
8. The fifth cell is the start of the course.
